

Element	Attribute	Type	Value	Description	Default
YearBuilt		Date: YYYY		The year in which the property was built. This may be a year in the future if new construction is being offered. In this case, the attribute NewConstruction should be set to "Yes".	
	NewConstruction	Enumerated	No	The building exists and YearBuilt represents the year in which the building was completed.	No
			Yes	The building may not exist, and YearBuilt represents the year in which completion is expected.	
CloseDate		Date: YYYY-MM-DD		The date on which a sale was recorded.	
ExpirationDate		Date: YYYY-MM-DD		The date on which a listing expires.	
ListDate		Date: YYYY-MM-DD		The date on which the listing contract became effective.	
ContractDate		Date: YYYY-MM-DD		The date on the sales contract when a listing is pending.	
StatusChangeDate		Date: YYYY-MM-DD		The date of the last change in listing status.	
ModificationTimestamp		DateTime		The date and time of the last modification of this record. The exact meaning of this field is implementation defined, though it is recommended that the modification timestamp be the date and time at which any field transmitted in the containing document was last changed.	
AssessedValuation		Numeric		Assessor's valuation of a property for tax purposes.	
	Type	Enumerated	INTEGER	The amount is expressed as an integer.	INTEGER
	CurrencyCode	Text	FLOAT	The amount is expressed as a floating-point number.	USD
AssociationFee		Numeric		For a residential or office condominium property, the amount of any required association fee expressed as an annualized amount. The payment intervals is given as an attribute.	
	Type	Enumerated	INTEGER	The amount is expressed as an integer.	INTEGER
	CurrencyCode	Text	FLOAT	The amount is expressed as a floating-point number.	INTEGER
	Period	Enumerated	Month	The currency in which the association fee is specified.	USD
			Day	The association fee is paid monthly.	Month
			Week	The association fee is paid daily.	
			Year	The association fee is paid weekly.	
			Fixed	The association fee is paid annually.	
ClosePrice		Numeric		The association fee is paid one time.	
	Type	Enumerated	INTEGER	The final sale price of a property.	INTEGER
	CurrencyCode	Text	FLOAT	The amount is expressed as an integer.	INTEGER
Expenses		Numeric		The amount is expressed as a floating-point number.	USD
	Type	Enumerated	INTEGER	The currency in which the close price is specified.	USD
			INTEGER	The total P&L expenses for an income property, expressed as an amount incurred in a given period, by default per year. Periods other than annual are deprecated.	INTEGER
			INTEGER	The amount is expressed as an integer.	INTEGER

Element	Attribute	Type	Value	Description	Default
			FLOAT	The amount is expressed as a floating-point number.	
	CurrencyCode	Text		The currency in which the expenses are specified.	USD
	Period	Enumerated	Month	The expenses are specified as a monthly amount.	Month
			Day	The expenses are specified as a daily amount.	
			Week	The expenses are specified as a weekly amount.	
			Year	The expenses are specified as an annual amount.	
			Fixed	The association fee is paid one time.	
GrossIncome		Numeric		The total P&L gross income for an income property, expressed as an amount earned in a given period, by default per year. Periods other than annual are deprecated.	
	Type	Enumerated	INTEGER	The amount is expressed as an integer.	INTEGER
			FLOAT	The amount is expressed as a floating-point number.	
	CurrencyCode	Text		The currency in which the gross income is specified.	USD
	Period	Enumerated	Month	The gross income is specified as a monthly amount.	Month
			Day	The gross income is specified as a daily amount.	
			Week	The gross income is specified as a weekly amount.	
			Year	The gross income is specified as an annual amount.	
			Fixed		
ListPrice		Numeric		The listing price for a property at the time of the query.	
	Type	Enumerated	INTEGER	The amount is expressed as an integer.	INTEGER
			FLOAT	The amount is expressed as a floating-point number.	
	CurrencyCode	Text		The currency in which the list price is specified.	USD
NetIncome		Numeric		The total P&L net income for an income property, expressed as an amount earned in a given period, by default per year. Periods other than annual are deprecated.	
	Type	Enumerated	INTEGER	The amount is expressed as an integer.	INTEGER
			FLOAT	The amount is expressed as a floating-point number.	
	CurrencyCode	Text		The currency in which the net income is specified.	USD
	Period	Enumerated	Month	The net income is specified as a monthly amount.	Month
			Day	The net income is specified as a daily amount.	
			Week	The net income is specified as a weekly amount.	
			Year	The net income is specified as an annual amount.	
			Fixed		
OriginalListPrice		Numeric		The listing price for the property at the date of the original listing contract.	
	Type	Enumerated	INTEGER	The amount is expressed as an integer.	INTEGER
			FLOAT	The amount is expressed as a floating-point number.	
	CurrencyCode	Text		The currency in which the original list price is specified.	USD
RentIncome		Numeric		The rent income for an individual unit expressed as an amount per given	

Element	Attribute	Type	Value	Description	Default
	Type	Enumerated	INTEGER	The amount is expressed as an integer.	INTEGER
			FLOAT	The amount is expressed as a floating-point number.	
	CurrencyCode	Text		The currency in which the rent income is specified.	USD
	Period	Enumerated	Month	The rent income is specified as a monthly amount.	Month
			Day	The rent income is specified as a daily amount.	
			Week	The rent income is specified as a weekly amount.	
			Year	The rent income is specified as an annual amount.	
			Fixed		
BathsTotal				The total number of individual bathrooms in a unit or property. If both BathsTotal and at least one of BathsFull, BathHalf or BathsThreeQuarter is present, then BathsTotal is expected to be the sum of BathsFull, BathHalf and BathsThreeQuarter.	
BathsThreeQuarter		Numeric		The number of three-quarter baths in a unit or property.	
Bedrooms		Numeric		The total number of bedrooms in the unit or property.	
CarPort		Numeric		The number of carport spaces in the parking facility for a residential unit or single-family property, or the total number for a multi-family property.	
	Type	Enumerated	INTEGER	The number of spaces is expressed as an integer.	INTEGER
			FLOAT	The number of spaces is expressed as a floating-point number.	
Commission		Numeric		The total commission to be paid for this sale, expressed as either a percentage or a constant currency amount.	
	Value	Enumerated	Percent	The commission is specified as a percentage of the selling price.	
			Currency	The commission is specified as a fixed amount.	
	CurrencyCode	Text		The currency in which a fixed commission is specified. The field has no meaning if the Value attribute is "Percent".	USD
CoveredParking		Numeric		The number of covered parking spaces in the parking facility for a residential unit or single-family property, or the total number for a multi-family property.	
DaysOnMarket		Numeric		For an active listing, the number of days the listing has been on the market as of the time of the query. For an off-market listing, the total number of days that the property was on the market.	
Fireplaces		Numeric		The number of fireplaces in the property.	
Garage		Numeric		The number of garage spaces in the parking facility for a unit or residential property, or the total number of garage spaces for a multi-family property.	
	Type	Enumerated	INTEGER	The number of spaces is expressed as an integer.	INTEGER
			FLOAT	The number of spaces is expressed as a floating-point number.	
	Style	Enumerated	Attached	The garage is attached to the dwelling or other building.	
			Detached	The garage is separate from the dwelling or other building.	

Element	Attribute	Type	Value	Description	Default
Latitude		Numeric		The geographic latitude of some reference point on the property, specified in degrees and decimal parts.	
Length	Type	Numeric	INTEGER	The length of the parent object.	INTEGER
		Enumerated	FLOAT	The length is expressed as an integer.	
Longitude		Numeric		The length is expressed as a floating-point number.	
OpenParking		Numeric		The geographic longitude of some reference point on the property, specified in degrees and decimal parts.	
Stories		Numeric		The number of open parking spaces in the parking facility for a residential unit or single-family property, or the total number for a multi-family property.	
		Numeric		The number of living space levels in the residential unit or single-family property, or the total number of floors for a multiresidential property.	
	Type	Enumerated	INTEGER	The number of stories is expressed as an integer.	INTEGER
			FLOAT	The number of stories is expressed as a floating-point number.	
TotalRooms		Numeric		The total number of rooms of all types in the residential unit or single-family property.	
TotalUnits		Numeric		The total number of units in a condominium development (when used within a CommonInterest element), or in a multi-family property.	
VacancyFactor		Numeric		The ratio of vacant units to total units, expressed as a decimal fraction.	
	Value	Enumerated	Percent	The vacancy factor is expressed as a percentage.	
			Decimal	The vacancy factor is expressed as a decimal fraction.	
Width	Type	Numeric		The width of a room or lot, expressed in the given units.	
		Enumerated	INTEGER	The width is expressed as an integer.	INTEGER
			FLOAT	The width is expressed as a floating-point number.	
Area		Text		The geometric area of a room or lot, expressed in the given units. Numeric areas are preferred; the "TEXT" unit is deprecated.	
	Units	Enumerated	SqFeet	The area is expressed in square feet.	SqFeet
			SqMeters	The area is expressed in square meters.	
			Acres	The area is expressed in acres.	
			Hectares	The area is expressed in hectares.	
	Type	Enumerated	INTEGER	The area is expressed as an integer number of units.	INTEGER
			FLOAT	The area is expressed as a floating-point number.	
			TEXT	The area is expressed as a text string that cannot usefully be interpreted as a number.	
Dimensions		Text		The dimensions of a room or lot. This SHOULD be expressed as a text string consisting of one or more numeric quantities giving the linear distance between vertices of the polygon enclosing the space and separated by whitespace and the letter "x".	

Element	Attribute	Type	Value	Description	Default
	Units	Enumerated	Feet	The dimensions are expressed in feet.	Feet
			Meters	The dimensions are expressed in meters.	
			Unspecified	The units in which the dimensions are specified is unknown.	
Basement		Container		The geometric description of a basement area for a property.	
	Present	Enumerated	Yes	The unit has a basement.	Yes
			No	The unit does not have a basement.	
DiningRoom		Container		The geometric description of a dining room in a residential unit or single-family property. Whether the room is physically separated from other rooms by walls is determined by local custom.	
	Present	Enumerated	Yes	The unit has a dining room.	Yes
			No	The unit does not have a dining room.	
FamilyRoom		Container		The geometric description of a family room in a residential unit or single-family property.	
	Present	Enumerated	Yes	The unit has a family room.	Yes
			No	The unit does not have a family room.	
LivingRoom		Container		The geometric description of a living room in a residential unit or single-family property. The definition of a living room is determined by local custom.	
	Present	Enumerated	Yes	The unit has a living room.	Yes
			No	The unit does not have a living room.	
LotSize		Container		The geometric description of a lot.	
LivingArea		Container		Container for the Area element giving the total living area of a residential unit or single-family property.	
Cooling		Text		Text description of the cooling system for a residential unit or single-family property, or for the complex in a multi-family property.	
	Present	Enumerated	Yes	The unit has cooling.	Yes
			No	The unit does not have cooling.	
Heating		Text		Text description of the heating system for a residential unit or single-family property, or for the complex in a multi-family property.	
	Present	Enumerated	Yes	The unit has heating.	Yes
			No	The unit does not have heating.	
Laundry		Text		Text description of the laundry facilities in a multi-family property.	
	Present	Enumerated	Yes	The unit has a laundry facility.	Yes
			No	The unit does not have a laundry facility.	
Pool		Text		Text description of the swimming facility in or associated with the property.	
	Present	Enumerated	Yes	The unit has a swimming pool or has access to one.	Yes
			No	The unit does not have access to a swimming facility.	
Utilities		Text		A description of the utilities available for a lot, and/or an indication of the presence of utilities.	
	Present	Enumerated	Yes	The parcel has utilities.	Yes

Element	Attribute	Type	Value	Description	Default
			No	The parcel does not have utilities.	
View		Text		An indication of whether a listing has a view. The definition of a view is determined by local custom.	
	Present	Enumerated	Yes	The unit has a view.	Yes
			No	The unit does not have a view.	
WaterFront		Text		An indication of whether a residential or multi-unit property is located on a waterfront. The definition of a waterfront is determined by local custom.	
	Present	Enumerated	Yes	The unit is located on a waterfront or has waterfront access.	Yes
			No	The unit is not located on a waterfront and/or does not have waterfront access.	
AgentID		Text		A locally-unique identifier for an agent. This may be the same as the NRDS ID.	
BoxNumber		Text		A post-office box number.	
BrokerID		Text		A locally-unique identifier for a broker. This may be a NRDS ID.	
BuildingName		Text		The name of a building within a common-interest or multi-family complex. This is considered descriptive information rather than addressing information.	
BuildingType		Text		The usage type of a building located within a common-interest or multi-family complex.	
CarrierRoute		Text		The carrier route portion of a postal address.	
CellPhone		Text		A cellphone telephone number.	
City		Text		The city in a postal address.	
ComplexFeatures		Text		A description of the features available within a common-interest or multi-family complex.	
CopyrightNotice		Text		A copyright notice for the information in the container within which the element resides.	
Country		Text		The country in a postal address.	
County		Text		For geographic information, the name of the county in which the property is located. For tax information, the name of the county holding taxation authority.	
DevelopmentStatus		Text		An indication of the current development status of a lot or parcel; for example, whether the parcel has been platted or recorded.	
Directions		Text		Driving directions to a property or location.	
Disclaimer		Text		A legal disclaimer that applies to the information in the element containing the Disclaimer element.	
ElementarySchool		Text		The name of the elementary school having a catchment area that includes the associated property.	
Email		Text		An email address.	
ExistingStructures		Text		A text description of any structures currently existing on a lot or land parcel for sale.	

Element	Attribute	Type	Value	Description	Default
Exterior		Text		A text description of the building exterior of a single-family or multi-family property.	
ExteriorFeatures		Text		A text description of the features of the exterior or outside of a single-family or multi-family property.	
Fax		Text		A telephone number for a fax machine.	
FirstName		Text		The first or given name of a person.	
HighSchool		Text		The name of the high school having a catchment area the includes the associated property.	
HomePhone		Text		A home telephone number.	
InteriorFeatures		Text		A description or list of features inside a residential unit, single-family property or multi-family property.	
LastName		Text		The last or family name of a person.	
LegalDescription		Text		The legal description of a property. This is the description that appears on the deed.	
ListingArea		Text		The area in which a listed property appears. The meaning of an area is determined by local custom; it need not be descriptive in any context other than that of a listing service.	
ListingID		Text		The unique ID of this listing.	
ListingServiceName		Text		The name of the service that holds the listing record within which this element is contained.	
ListingType		Text		The type of listing arrangement. The content should contain some indication of exclusivity or special conditions.	
MapCoordinate		Text		A map coordinate for the property, as determined by local custom. This is not necessarily the same as the geographic coordinate but may depend on the coordinate system used by whatever mapping service is customarily used by the listing service.	
MiddleSchool		Text		The name of the middle school having a catchment area that includes the associated property.	
Name		Text		The name of an entity.	
NRDSMemberID		Text		A NRDS member identifier.	
NRDSOfficeID		Text		A NRDS office identifier.	
OfficeID		Text		A locally-unique office identifier.	
OfficePhone		Text		A telephone number for an office.	
OwnerPays		Text		A text description of expenses or utilities paid by the owner of a multi-family property.	
Ownership		Text		A text description of the manner in which title to a property is held.	
OwnersName		Text		The name of the owner of a parcel.	
Pager		Text		A telephone number for a pager. If an access code is also required, it should be separated from the telephone number by the token "ACCESS" surrounded by whitespace.	
ParcelAccess		Text		A description of the access available for a lot or land parcel.	

Element	Attribute	Type	Value	Description	Default
ParcelMapURL		Text		A URL which can be used in order to retrieve a map for a lot or land parcel. The URL need not be publicly accessible.	
ParcelNumber		Text		The parcel number assigned by the taxation authority with jurisdiction over the property.	
PictureID		Text		A unique identifier for a photograph or other media.	
PostalCode		Text		The postal code portion of a street or mailing address.	
PresentUse		Text		A description of the use of a lot or parcel for sale. The description may reflect current information or may reflect the use as of the date of the listing. This is not necessarily the same thing as the present zoning, which is given by PropertyZoning.	
PropertyZoning		Text		The zoning designation for the property according to local custom.	
PublicRemarks		Text		The text of any remarks that can be displayed to the public, that is, conveyed to a system which does not require authorization to use.	
Remarks		Text		Arbitrary remarks. Applications SHOULD NOT convey this field to a system which permits access by unauthenticated users, such as a public web server.	
Roof		Text		A text description of the roof of a building.	
SchoolDistrict		Text		The name of the school district having a catchment area in which the property is located.	
ShowingInstructions		Text		Information indicating the time and manner of showing acceptable to the owner or occupant of a property.	
StateOrProvince		Text		The state or province of a mailing address.	
StreetAdditionalInfo		Text		Information other than a prefix or suffix for the street portion of a postal address.	
StreetDirPrefix		Text		The direction indicator that precedes the street name.	
StreetDirSuffix		Text		The direction indicator that follows a street name.	
StreetName		Text		The name of the street in a street address.	
StreetNumber		Text		The address number portion of a street address.	
StreetSuffix		Text		The suffix portion of a street address. This is usually a street type designator such as "street", "way", "court", etc.	
Style		Text		The building style for a single-family or multi-residential property, as determined by local custom.	
Subdivision		Text		The name of the subdivision in which a property resides. The use of this field is determined by local custom; it need not be associated with the legal description of the property.	
TaxID		Text		A listing service identifier associated with the tax information for this property or tax record.	
TenantPays		Text		A description or list of expenses or utilities paid by the tenant in a residential unit.	
Topography		Text		A description of the local topography surrounding a property or parcel.	

Element	Attribute	Type	Value	Description	Default
Type		Text		A field associated with a single-family or multi-family property with use determined by local custom. Deprecated.	
UnitNumber		Text		The unit number portion of a street or mailing address.	
URL		Text		A uniform resource locator.	
	Internal	Enumerated	No	The URL is external to the server from which this document was retrieved.	No
			Yes	The URL is available from the server from which this document was retrieved.	
Unstructured		Text		A completely unstructured street address.	
Zoning		Text		The present zoning of a property.	
ResidentialProperty		Container		A description of a single-family or common-interest residential property.	
CommonInterest		Container		A description of a residential property contained in a common-interest development, together with the complex within which the property is located.	
LotsAndLand		Container		A description of a lot or land parcel.	
MultiFamily		Container		A description of a multi-family property being conveyed or described in its entirety and containing zero or more individual units.	
Complex		Container		A description of a complex within which are contained multiple individual residences.	
Listing		Container		A listing or offering for sale of a real property.	
Unit		Container		A description of an individual unit of a common-interest development or multi-family property.	
GeographicData		Container		A container for all geographic descriptions of a property.	
SchoolData		Container		A container for all school-related information for a property.	
TaxData		Container		A container for tax record information associated with a listing.	
PictureData		Container		The descriptive information for a picture or other media element.	
REOffice		Container		The information designating and describing a real estate office.	
REAgent		Container		The information designating and describing a real estate agent.	
Occupant		Container		Information about the occupant of a property.	
ContactInformation		Container		Information about the methods of communicating with a person or entity.	
StreetAddress		Container		A street address, either parsed or unparsed. Parsed addresses are the preferred representation; the use of Unstructured should be reserved for addresses which do not conform to normal postal service formatting conventions.	
MailingAddress		Container		A street address to be used for mailing, in preference to any other street address contained within the parent element.	
ListingData		Container		Information about the listing itself, rather than the listed property.	
SalesData		Container		Information about a completed property sale.	

Element	Attribute	Type	Value	Description	Default
MLSInformation		Container		Information about the status of a listing record within its multiple listing system.	
ListingStatus		Text		A text description of the status of a listing. It is preferred that this element be empty and that the associated Status attribute be used to convey listing status. The element content should be supplemental to the Status attribute.	
	Status	Enumerated	Active	The listing is currently offered for sale.	#REQUIRED
			Closed	The listing has been sold.	
			Expired	The listing has expired.	
			OffMarket	The listing is no longer on-market, but has neither expired or been sold.	
			Pending	A sale of the listing is pending.	
Baths		Container		Information about the number and type of bathrooms in a residential unit or single-family property.	
Parking		Container		Information about the parking facilities in a single-family or multi-family property, or associated with a unit of a multi-family property.	
Rooms		Container		Information about the individual rooms in a single-family property or a single unit of a multi-family property.	
REData		Container		The root element for real-estate data, subordinate only to transport-level containers.	
REProperties		Container		A container for all property descriptions.	
REOfficeRosters		Container		A container for all office rosters.	
REOfficeRosters		Container		A container for offices and agents.	
REAgents		Container		A container for multiple agents.	
REOffices		Container		A container for multiple offices.	
REProspects		Container		A container for multiple prospect records.	
REActivities		Container		A container for multiple activity records.	
REHistories		Container		A container for multiple listing history records.	
REPropHistory		Container		A container for multiple property history records.	
REPublicRecords		Container		A container for multiple tax records.	
ProspectModificationTimestamp		Timestamp		The date and time on which a prospect record was last modified.	
ProspectID		Text		A unique identifier for a prospect record.	
ProspectUsedTimestamp		Timestamp		The date and time on which a prospect record was last used for a search.	
ProspectPropertyClass		Text		The property class for which the search associated with the prospect record should be executed. This should normally use the StandardName, though provision exists to avoid that if necessary.	
	StandardNames	Enumerated	Yes	The property class is one of the standard names.	
			No	The property class is not one of the standard names.	No
ProspectPropertyQuery		Text		The query for this prospect, in the specified language.	

Element	Attribute	Type	Value	Description	Default
	StandardNames	Enumerated	Yes	The query uses standard names.	
			No	The query does not use standard names.	No
	Type	Enumerated	DMQL2	The query is formulated using the DMQL2 language.	DMQL2
			DMQL	The query is formulated using the DMQL language.	
ProspectPublicName		Text		The name associated with this prospect record.	
REProspect		Container		A prospect (stored search) record.	
ProspectAgent		Container		The agent ID or full agent information for the agent associated with the containing prospect.	
ProspectOffice		Container		The office ID or full office information for the office associated with the containing prospect.	
EndDateTime		Timestamp		The date and time at which an activity ends.	
StartDateTime		Timestamp		The date and time at which an activity starts.	
	Timeless	Enumerated	No	The activity does not have a specific start time.	No
			Yes	The activity does not have a specific start time.	
ProfSequence		Numeric		A sequence number ordering a given activity within a group of activities.	
ActivityClassification		Text		The classification or type of activity. The "Type" attribute should be sufficient to determine the classification; the data portion of this element should be supplementary only.	
	Type	Enumerated	Tour	The activity is a tour or caravan.	Tour
			Open	The activity is an open-house.	
			Showing	The activity is a professional showing.	
			Other	The activity is neither a tour, an open-house nor a showing.	
ActivityComments		Text		Free-form comments elaborating the description of the activity.	
ActivityID		Text		A locally-unique identifier for the activity record.	
ActivityStatus		Text		An indication of the status or completion state of an activity.	
	Complete	Enumerated	No	The activity is not yet complete.	No
			Yes	The activity has been completed.	
Board		Text		The name of the real estate board or association responsible for the activity.	
ProfDirections		Text		Driving directions for the activity. This is generally meant to be used when an activity is intended for members of the profession.	
ProfComments		Text		Comments associated with an organized sequence of visits to various activities in a group. This is generally meant to be used when an activity is intended for members of the profession.	
ProfOptions		Text		Additional commentary about refreshments or other amenities at the activity. This is generally meant to be used when an activity is intended for members of the profession.	
	Lunch	Enumerated	No	Lunch will not be served during this activity.	No
			Yes	Lunch will be served during this activity.	

Element	Attribute	Type	Value	Description	Default
	Refreshments	Enumerated	No	Refreshments will not be served during this activity.	
			Yes	Refreshments will be served during this activity.	
Regarding		Text		Additional descriptive information giving the intended focus of the activity.	
REActivity		Container		A single activity record comprising descriptive and calendar information.	
Event		Container		Descriptive, calendar and hosting information for an activity.	
Place		Container		An indication of the location of an activity.	
ActivityAgent		Container		Identifying information for an agent associated with an activity.	
ActivityOffice		Container		Identifying information for an office associated with an activity.	
Participants		Container		Contains all participants for an activity.	
Person		Container		Descriptive and contact information for an individual person.	
ProIDetails		Container		Contains all professional information regarding an activity.	
ChangeType		Text		An indication of the type or nature of the change to the listing record.	
	System	Enumerated	No	The change was made manually by a user.	No
			Yes	The change was made as the result of a system processing activity.	
EntryID		Text		A locally-unique identifier for a listing history record.	
REPropEntry		Container		A container for a single listing history record.	
EntryAgent		Container		A container for identifying information for the agent whose authorization was used in making the listing change.	
EntryOffice		Container		A container for identifying information for the office associated with the agent whose authorization was used in making the listing change.	
PropertyRecord		Container		A container for the record which was changed.	
DocumentDate		Date		The date of the document affecting the tax status for a property.	
MortgageAmount		Numeric		The mortgage amount recorded for a mortgage in a tax document.	
	Type	Enumerated	INTEGER	The amount is expressed as an integer.	INTEGER
			FLOAT	The amount is expressed as a floating-point number.	
	CurrencyCode	Text		The currency in which the mortgage amount is specified. This is not USD necessarily the currency in which the mortgage must be paid.	USD
DocumentID		Text		A locally-unique record identifier for a particular tax document record.	
DocumentType		Text		The type of tax document.	
TransactionType		Text		The type of transaction memorialized or consummated by this document.	
VestmentType		Text		The type of vestment associated with this document.	
RETax		Container		A single tax transaction record.	
ParcelLocation		Container		A container for address information associated with the parcel.	
OwnershipType		Text		The manner in which ownership is held in the property.	
ParcelOwner		Container		A container for all ownership information associated with the parcel or property.	

Element	Attribute	Type	Value	Description	Default
TaxTransactionData		Container		A container for information about the transaction that resulted in the last change of ownership information.
