Methodology

Each year in July, NAR mails out a 131-question survey using a random sample weighted to be representative of sales on a geographic basis to recent home buyers. The recent home buyers had to have purchased a primary residence home between July of the past year and June of the current year.

The data used for this report is aggregation of all of the responses from the 2015, 2016 and 2017 HBS survey, totaling 20,130 responses. Seventeen percent of recent home buyers are veterans and two percent are active-service military.

Respondents had the option to fill out the survey via hard copy or online. The online survey was available in English and Spanish.

Consumer names and addresses were obtained from Experian, a firm that maintains an extensive database of recent home buyers derived from county records. Information about sellers comes from those buyers who also sold a home.

The median is the primary statistical measure used throughout this report. Due to rounding and omissions for space, percentage distributions may not add to 100 percent. Data gathered in the report is based on primary residence home buyers.
The National Association of REALTORS®, “The Voice for Real Estate,” is America’s largest trade association, representing 1.3 million members, including NAR’s institutes, societies and councils, involved in all aspects of the real estate industry. NAR membership includes brokers, salespeople, property managers, appraisers, counselors and others engaged in both residential and commercial real estate.

The term REALTOR® is a registered collective membership mark that identifies a real estate professional who is a member of the National Association of REALTORS® and subscribes to its strict Code of Ethics.

Working for America’s property owners, the National Association provides a facility for professional development, research and exchange of information among its members and to the public and government for the purpose of preserving the free enterprise system and the right to own real property.

**NATIONAL ASSOCIATION OF REALTORS® RESEARCH GROUP**

The Mission of the National Association of REALTORS® Research Group is to collect and disseminate timely, accurate and comprehensive real estate data and to conduct economic analysis in order to inform and engage members, consumers, and policymakers and the media in a professional and accessible manner.
