2018 Housing Wealth Gains Report

Albuquerque NM

Homeownership and Wealth

Homeownership is associated with higher wealth. In 2016, homeowners' median net worth was $231,400, or 45 times the median net worth of renters. Housing was the largest source of wealth: the average net housing wealth was $197,500 — 85 percent of median homeowners' net worth.
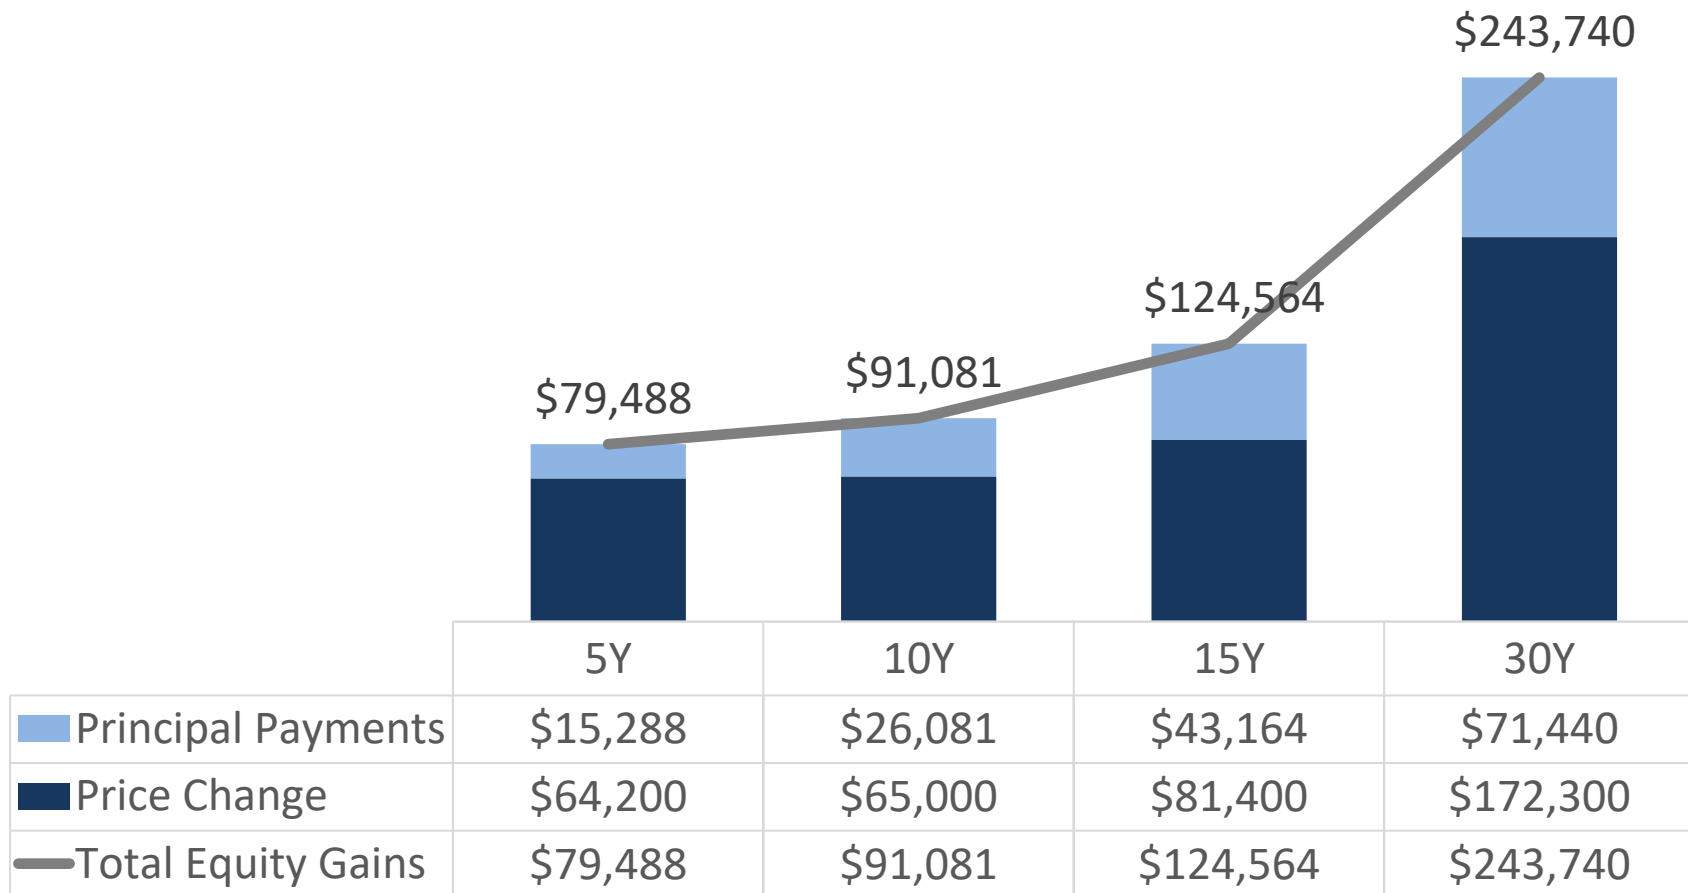

Median Family Net Worth (in Thous. $)

| Year	Homeowners	Renters	Ratio
1989	$187.2	$3.6	52.0
1992	$165.8	$5.4	30.7
1995	$163.1	$7.6	21.5
1998	$194.9	$6.3	30.9
2001	$233.8	$6.5	36.0
2004	$234.9	$5.1	46.1
2007	$271.9	$5.9	46.1
2010	$192.8	$5.6	34.4
2013	$201.5	$5.5	36.6
2016	$231.4	$5.2	44.5

NATIONAL ASSOCIATION of REALTORS®
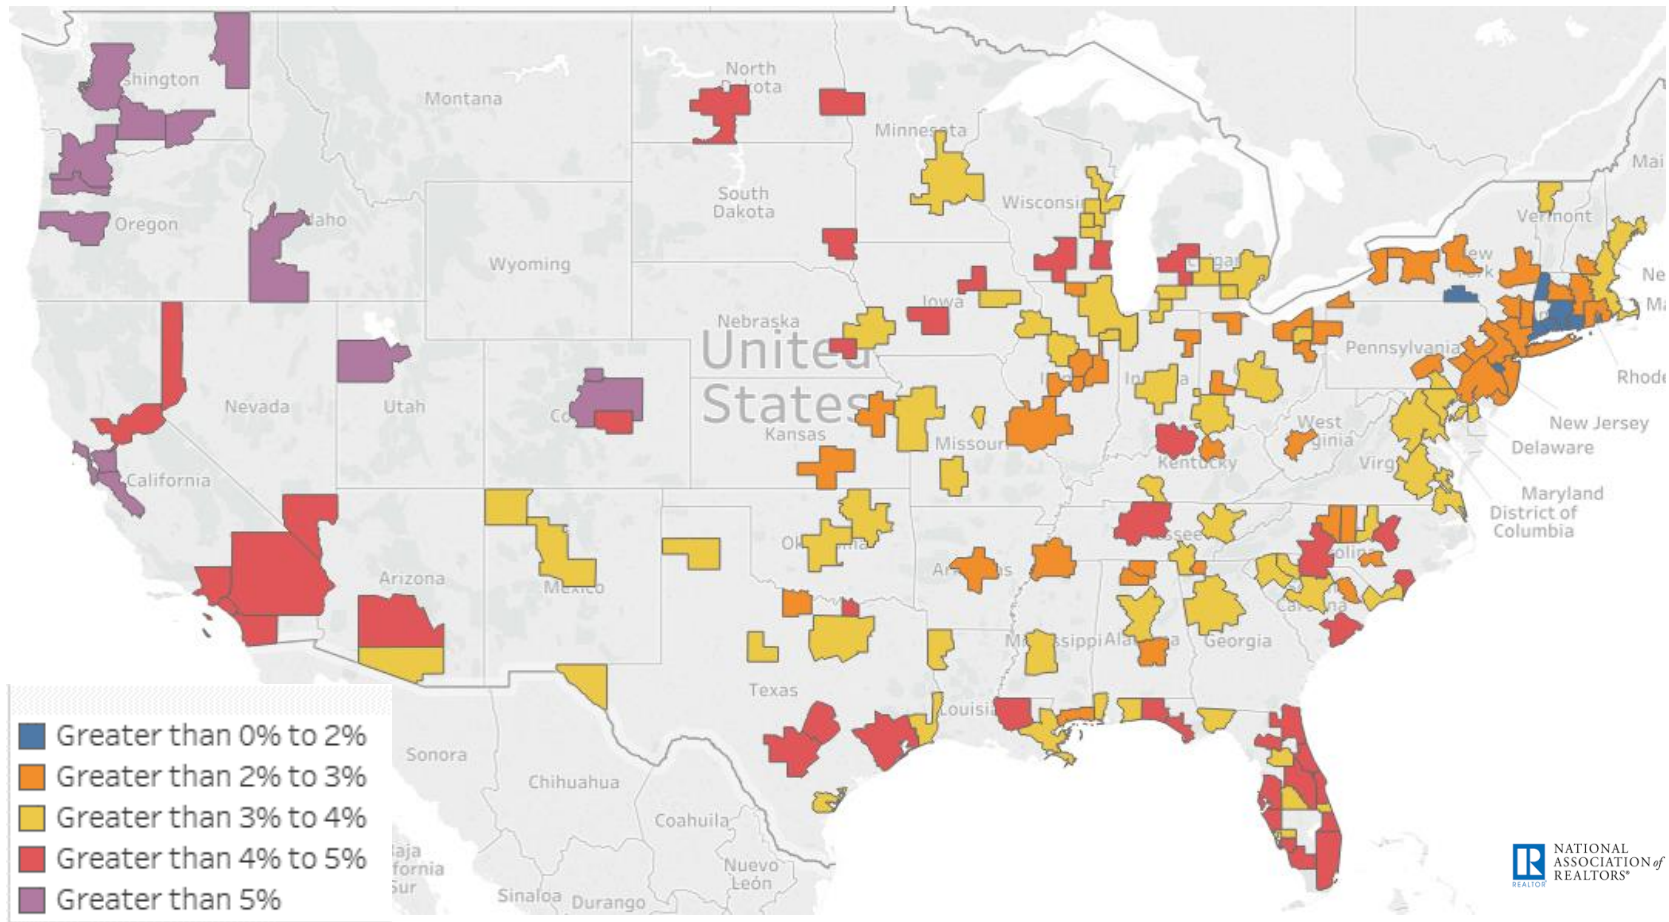

2018 Median Sales Price, Single-family Existing Home

Albuquerque NM   **$205,600**
United States   **$261,600**

NATIONAL
ASSOCIATION of
REALTORS®
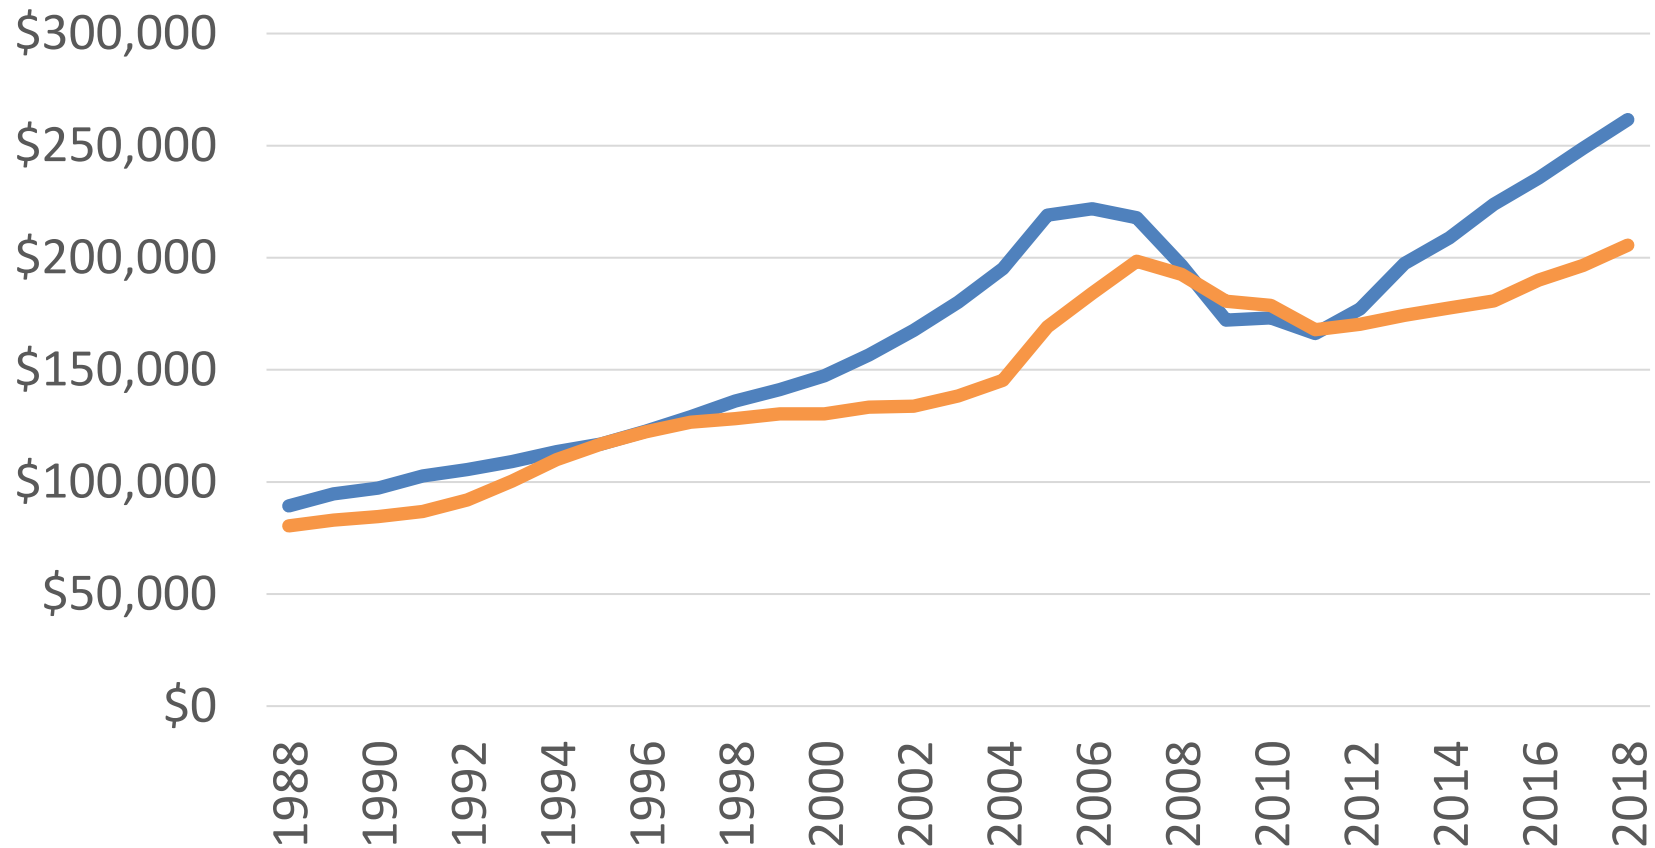

Methodology

Changes in home prices and principal payments lead to changes in housing wealth.

The National Association of REALTORS ® calculated the wealth gains from purchasing a single-family existing home

at the median sales price with a 30-year fixed rate mortgage financing and 20 percent downpayment

over 5,10,15,30 year-holding periods. Metro area delineations change so data may not be available for some periods.
The estimates are illustrative of the typical change in housing wealth; actual gains or losses will vary by property.

Calculation of change in housing wealth(equity) over holding period (n years):

Housing wealth (Equity) = Assets - Liabilities

(1) Housing wealth (Equity) at time of Purchase = Market Value (Sales Price) - Loan

(2) Housing wealth (Equity) at Year n = Market Value at Year n - (Loan -Total Principal Payments)

Housing wealth (Equity) Gains at Year n= (2)- (1)

Housing wealth (Equity) Gains at Year n = (Market Value, Year n - Sales Price) + Total Principal Payments

Calculation of annual percent change in home prices over 30 years:

Compounded annual growth rate=((Market value at n=30)/(Market value at time of purchase))^(1/30))-1
In metro areas for which the data is not available in the last 30 years, the growth rate is calculated over the
years for which data is available.
