The National Flood Insurance Program (NFIP) is essential to completing half a million property sales each year\(^1\), but it must be reauthorized by September 30, 2019 to continue providing flood insurance. REALTORS® support H.R. 3167 and urge Congress to find a way forward on a long-term NFIP reauthorization.

**Properties at Risk**

Every property in the state has some flood risk; wherever it rains, it can flood, yet not all at-risk are insured.

\[14,177,270\] Total housing units, 2017  
\[1,964,142\] Housing units in the state within a 500-year floodplain, 2015\(^2\)  
\[226,337\] Number of NFIP policies in force as of April 30, 2019\(^3\)  
\[2\%\] Percent of housing units with an NFIP policy

**Flood Insurance Benefits to Policyholders**

For many, owning a property is the biggest source of wealth. The NFIP offers substantially more rebuilding assistance than FEMA's Individuals and Households Program (IHP) for uninsured properties.

\[\$548,304\] Median home value, 2019 Q1\(^4\)  
\[\$19,079\] Average NFIP dollar amount paid on residential claims for properties in the state, 1996–2016\(^5\)  
\[11,483\] Number of NFIP paid claims\(^5\)  
\[\$11,056\] Average IHP disaster payment to those without flood insurance in the state, 2006–2016\(^6\)  
\[5\] Number of IHP disaster payments\(^6\)

98% of U.S. counties have experienced at least one major flood disaster declaration.\(^7\) Without flood insurance, property owners must turn to the federal government for rebuilding assistance. The total cost to taxpayers of uninsured property damage is $3.4 billion each year.\(^8\)

\[\text{[3]}\] Source: NAR tabulation of FEMA Policies Redacted Data Set released July 16, 2019 (data through as of April 30, 2019).  
\[\text{[4]}\] Source: NAR estimate using data from U.S. Census Bureau’s American Community Survey and Federal Housing Finance Agency Home Price Index  
\[\text{[7]}\] Source: FEMA  
\[\text{[8]}\] Source: Congressional Budget Office' Expected Costs of Damage from Hurricane Winds and Storm Related Flooding, p.3., April 2019

The one-year cost of flood damage to the residential sector is $20 billion, of which 17% is for federal disaster assistance ($3.4 B).
