

Cyber insurance made for today's real estate industry

CyberPolicy, in partnership with NAR, created a customized and comprehensive cyber liability insurance program designed exclusively for REALTOR®-owned firms.

Cyber crimes are on the rise and every real estate business needs cyber insurance.

Malware, hacks, and data loss are very real threats in the real estate industry. High value transactions and sensitive customer information make the real estate industry a prime target for hackers.

Every document that contains a client's sensitive information is valuable and can be used by hackers.

- Offer Letters
- Purchase Agreements
- Loan Applications

- Proof Of Funds Documents
- Pre-Approval Letters
- Wire Transfer Instructions

Coverage for you AND clients

A policy that offers first-party (you) AND third-party (the client) coverage for actual financial losses. Typical Errors & Omissions and General Cyber Liability policies do not include such coverage to both you AND your client. Covering your client's financial losses due to a breach of your email is unique to CyberPolicy and designed to meet a specific need within the real estate industry.

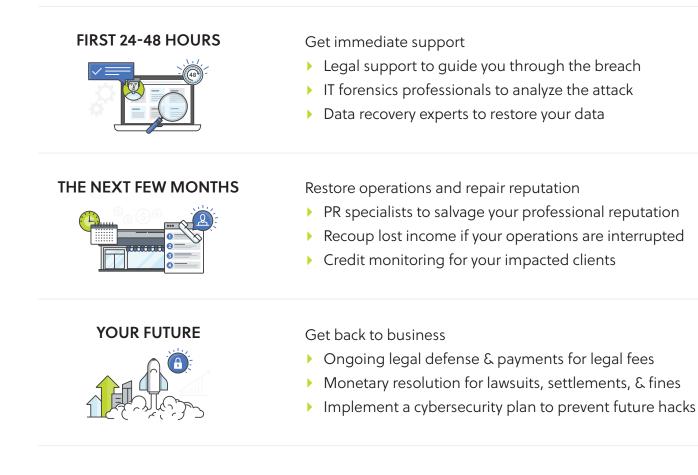

For many real estate professionals a cyber attack is not a matter of IF, it's a matter of WHEN.

When a cyber attack hits, we're here to get you back on your feet

- Recoup revenue lost after a hack
- Recover stolen data & critical information
- Restore operations quickly
- Preserve your professional reputation

NAR Member-Exclusive Cyber Insurance

Receive discounted monthly premiums, higher coverage limits and no retroactive dates, plus tools and support that will strengthen your cybersecurity and prevent cyber crimes.
