When a Home is Sold in the United States

It generates an economic “multiplier” impact. There is greater spending at restaurants, sports games, and charity events. The size of this multiplier effect is estimated to be:

$11,802

Additional home sales induce added home production. Typically, one new home is constructed for every eight existing home sales. Therefore, for each existing home sale, 1/8 of a new home’s value is added to the economy which is estimate in this state to be:

$27,800
