NAR Sustainability Program

In order to position NAR as a leader in real estate sustainability topics with REALTORS®, brokers, allied trade associations, and consumers, the REALTOR® Sustainability program efforts focus on coordination and articulation of new and existing association benefits and resources. Identifying the growth of sustainability in real estate, this program conducts outreach to members, appropriate trade associations and agencies to raise awareness and engagement in NAR sustainability efforts. Additionally, it identifies resources that would benefit all members. Finally, this program introduces corporate social responsibility and triple bottom line concepts into NAR’s decision-making practices, allowing NAR to educate and support sustainability in real estate through environmental, social, and economic contexts.

- **Vision Statement:** REALTORS® thrive in a culture of sustainability that promotes viability, resiliency, adaptability, and resource efficiency.
- **Member Mission:** Provide leadership and strategies on topics of sustainability that benefit members, REALTOR® associations and communities.

NAR is positioned to respond to sustainability questions and informational needs of members, brokers, government agencies, and consumers. Strengthens NAR’s influence on legislative and regulatory issues related to sustainability. Resources designed to identify, articulate, and grow sustainability opportunities are easily accessible throughout all levels of the organization and address the most basic to the highly complex business needs.

To find out more, visit [https://www.nar.realtor/topics/Sustainability](https://www.nar.realtor/topics/Sustainability).
In a move driven by the wishes of its members, the National Association of REALTORS® (NAR) initiated the Sustainability Program as a platform for dialogue about sustainability in real estate for REALTORS®, brokers, allied trade associations, and consumers. The program’s efforts focus on coordination and articulation of NAR’s existing sustainability resources, while also supporting a growing area of interest for consumers, helping members to assist home buyers and sellers.

In February 2017, NAR surveyed its members pertaining to sustainability issues facing their industry. This report summaries those findings.

**Highlights:**

- Forty-three percent of respondents report their MLS has green data fields.
- Seventy-one percent said that energy efficiency promotion in listings was very or somewhat valuable.
- Fifty-six percent of respondents find clients are at least somewhat interested in sustainability.
- Twenty-four percent said that tiny homes were available in their market.
- Sixty-one percent of respondents are comfortable answering clients’ questions about home performance.
- Sixteen percent said that wind farms are available in their market. Fourteen percent said wind farms increased the perceived property value.
- Eighty percent said that solar panels are available in their market. Forty-two percent said solar panels increased the perceived property value.
- Eight percent of respondents frequently have clients who request to see properties close to public transportation.
- Twenty-seven percent of agents and brokers were involved with 1 to 5 properties that had green features in the last 12 months.
- Thirteen percent of brokerage firms have experience working with commercial building repurposing and 17 percent with residential repurposing.
- Eighty-six percent have taken steps to reduce waste and energy usage.
- Ten percent of firms set goals to reduce energy usage by a specified date.
- Eleven percent of brokers use an environmentally efficient car.
Multiple Listing Service

Forty-three percent of respondents report their MLS has green data fields, compared to 19 percent that do not have green data fields.
A majority of agents and brokers (71 percent) said that energy efficiency promotion in listings was very or somewhat valuable.
A majority of agents and brokers (16 percent) said that solar panels are available in their market. Forty-two percent said solar panels increased the perceived property value, compared to 31 percent that said they had no effect.
Solar Panels

- Forty-eight percent of agents and brokers are unclear if the time on market is longer or shorter for properties with solar panels. Thirty-two percent believe the time on market is the same.

Perceived Time on Market with Solar Panels

- 48% are unclear
- 32% believe it is the same
- 11% believe it is a little more time
- 5% believe it is a little less time
- 2% believe it is much less time
- 4% believe it is much more time
- 5% believe it is a little more time
- 10% believe it is neither more or less time
Sixteen percent of respondents said that wind farms are available in their market. Fourteen percent said wind farms increased the perceived property value, compared to 38 percent that said they had no effect.
Twenty-four percent of brokers said that tiny homes were available in their market, compared to 61 percent that reported tiny homes were not yet available. Tiny homes were defined in the survey as homes that are 600 square feet or less.
Twenty-seven percent of agents and brokers were involved with 1 to 5 properties that had green features in the last 12 months. Seventy percent of members worked with no properties that had green features.

Number of Properties with Green Features 
Respondents Were Involved With in Past 12 Months 
(Buyer or Seller Side)
The home features that clients listed as very important to their agent or broker include a comfortable living space (71 percent), proximity to frequently visited places (40 percent), windows, doors, and siding (39 percent), and a home’s utility bills and operating costs (28 percent).
The neighborhood features that clients look for include access to schools (79 percent), access to shopping (72 percent), parks and outdoor recreation (60 percent), and affordable housing (38 percent).
The transportation and commuting features that clients listed as very or somewhat important include easy access to highways (82 percent), commute times and distance (81 percent), and walkability (51 percent).
Eight percent of respondents frequently have clients who request to see properties close to public transportation, 21 percent report sometimes they have clients who make the request, and 27 percent rarely have clients who make the request.
Building Repurposing

- Thirteen percent of brokerage firms have experience working with commercial building repurposing and 17 percent have experience with residential building repurposing. Repurposing occurs when markets reuse space in buildings that once served a different purpose altogether, such as factories which are converted to lofts or apartments.

### Commercial Building Repurposing

- Brokerage has experience working with commercial building repurposing: 13%
- Brokerage does not have experience working with commercial building repurposing: 45%
- Don't know: 43%

### Residential Building Repurposing

- Brokerage has experience working with residential building repurposing: 17%
- Brokerage does not have experience working with residential building repurposing: 41%
- Don't know: 42%
Half of agents and brokers find consumers (51 percent) are somewhat interested in sustainability and nine percent are very interested.
Market Issues and Considerations

- Market issues and considerations that agents and brokers listed include understanding lending options for energy upgrades or solar panels (44 percent), improving energy efficiency of existing housing stock (40 percent), and lack of MLS data about home performance and/or solar panel installation (34 percent).

Issues and Considerations in Market

- Understanding lending options for energy upgrades or solar: 44%
- Improving the energy efficiency of existing housing stock: 40%
- Lack of MLS data about home performance and/or solar install: 34%
- Valuation of solar panels on homes: 30%
- Lack of information and materials provided to REALTORS®: 29%
- Understanding how solar panels impact a transaction: 29%
- Valuation of green certified homes: 23%
- Rising coastlines or floodplains: 22%
- Liability of misrepresenting a property with green features: 20%
- Inability to search for green properties: 19%
- Tiny homes (600 sq ft or less): 13%
- Lack of information and materials provided to other professionals: 13%
Sixty-one percent of respondents are comfortable answering clients’ questions about home performance, while 27 percent said they were somewhat uncomfortable.
Brokerage Energy Reduction Goals

- The majority of brokerage firms have not set goals to reduce energy by a certain date at 44 percent, compared to only 10 percent of firms that have set goals to reduce energy usage by a specified date. Nine percent are currently working setting up and implementing goals.

Set Energy Reduction Goals by Brokerage

- 44% have set goals to reduce energy by a certain date
- 10% have not set goals to reduce energy by a certain date
- 9% are not yet but working on it
- 4% are not yet but plan to
- 34% don't know
Only 11 percent of brokers use an environmentally efficient car, compared to 57 percent that do not currently use an efficient car nor plan to in the future. Twenty-nine percent of brokers do not have an efficient car but do plan to use one in the future.

Use of Efficient Cars While Conducting Business

- Use an efficient car and plan to continue in the future: 11%
- Use an efficient car but do not plan to in the future: 1%
- Do not use an efficient car but plan to in the future: 29%
- Do not use an efficient car and do not plan to in the future: 57%
- Don’t know: 2%

2017 Sustainability Report
Working From Home

- Nearly all brokerage firms allow their employees to work from home at 98 percent. Only two percent do not allow remote work.

Brokerage Work From Home Policy

- 98% Brokerage allows employees to work from home
- 2% Brokerage does not allow employees to work from home
- 1% Don't know

2017 Sustainability Report
A majority of respondents (86 percent) have taken steps to reduce waste and personal energy usage, compared to 12 percent that have not taken steps.

NAR Survey Respondents

- Of the real estate agents surveyed, the median age was 54 years—29 percent falling into the age bracket between 55 to 64 years, 25 percent between 45 to 54 years, 17 percent between 65 to 74 years, and 16 percent between 35 to 44 years.
- The primary functions of survey respondents was a sales agent at 69 percent, followed by a broker-owner at 10 percent.
- The regional distribution of survey respondents was fairly even between the West (31 percent), South (31 percent), and Midwest (25 percent), and lower in the Northeast (13 percent).
- Thirty-nine percent of survey respondents worked 40 to 59 hours per week, followed by 37 percent who worked 20 to 39 hours.
- Nearly six in 10 (57 percent) of survey respondents worked suburban areas, followed by 36 percent in urban and central city areas, and 26 percent in rural areas.
In February 2017, NAR invited a random sample of 54,878 active REALTORS® to fill out an online survey. A total of 2,867 usable responses were received for an overall response rate of 5.2 percent. At the 95 percent confidence level the margin of error is plus-or-minus 1.83 percent.

The primary measure of central tendency used throughout this report is the median – the middle point in the distribution of responses to a particular question or, equivalently, the point at which half of the responses are above and below a particular value.
The National Association of REALTORS®, “The Voice for Real Estate,” is America’s largest trade association, representing 1.2 million members, including NAR’s institutes, societies and councils, involved in all aspects of the real estate industry. NAR membership includes brokers, salespeople, property managers, appraisers, counselors and others engaged in both residential and commercial real estate.

The term REALTOR® is a registered collective membership mark that identifies a real estate professional who is a member of the National Association of REALTORS® and subscribes to its strict Code of Ethics.

Working for America’s property owners, the National Association provides a facility for professional development, research and exchange of information among its members and to the public and government for the purpose of preserving the free enterprise system and the right to own real property.

**NATIONAL ASSOCIATION OF REALTORS® RESEARCH DIVISION**

The Mission of the National Association of REALTORS® Research Division is to collect and disseminate timely, accurate and comprehensive real estate data and to conduct economic analysis in order to inform and engage members, consumers, and policymakers and the media in a professional and accessible manner.
