

# Alaska

Alaska

Of the approximately 160,000 owner-occupied houses in Alaska in 2016, 63% had a mortgage. 9.9% of the housing units with a mortgage had a value higher than \$500,000 while 1.4% of the owners paid over \$10,000 for real estate taxes. Vacation homes accounted for 10.0% of the housing units in Alaska.

## Facts on tax deductions

	Mortgage interest deduction claimants	Real estate taxes deduction claimants	Sales Tax deduction claimants*	Income taxes deduction claimants*	Student Loan deduction claimants
<b>Number of taxpayers claiming:</b>	66,400	72,000	21,700	20,600	30,300
	Mortgage interest deduction amount	Real estate taxes deduction amount	Sales Tax deduction amount*	Income taxes deduction amount*	Student loan deduction amount
<b>Average amount subtracted from taxable income:</b>	\$9,600	\$4,450	\$1,100	\$1,200	\$1,050
	Mortgage interest deduction savings	Real estate taxes deduction savings	Sales tax deduction savings*	Income taxes deduction savings*	Student loan deduction savings
<b>Average savings at 25% marginal rate:</b>	\$2,400	\$1,110	\$280	\$300	\$260

\*taxpayers can claim a deduction for state and local income taxes paid to other states.

(e.g. owning a rental property in another state, being a partner in an out-of-state partnership, being an S corporation shareholder and the corporation does most of the business in a state other than the state where you live etc.)

## Capital gains exemption

Under current tax framework, a typical owner, who has lived in his house for at least 2 years out of the last 5 years, will pay nothing in capital gain taxes if he sells his house. Under the proposed tax frameworks, owners need to live in their house for at least 5 out of the last 8 years in order to claim the exemption. Otherwise, they need to pay \$4,875 in capital gain taxes.

In 2016, 16.1% of owners in Alaska have lived in their homes for 2-4 years. These owners will not be able anymore to take the exemption based on the proposed tax frameworks.

## Impact on housing prices

If both mortgage interest and real estate taxes deductions will be eliminated, home prices expect to fall from 9% to 13%. A decline in value as projected could mean a loss in home value of \$23,620 - \$35,400 for the typical homeowner.
